DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21-30, 35(21,22)-37, 39(21,22)-52 [incorporating all dependent claims that depend upon independent claims 21 and 22], drawn to a method of cleaning or decreasing roughness of a roll, classified in class 134, subclass 6.
 - II. Claims 31-37, 39(31)-52 [incorporating all dependent claims that depend upon independent claim 31], drawn to a method of making a composite doctor blade, classified in class 264, subclass 257.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are the method of cleaning a circumferential surface/decreasing the roughness of a circumferential surface by positioning a doctor blade along near a roll surface, that the doctor blade comprises a plurality of unidirectional fibers in a unidirectional fabric, and pressing a beveled edge of the blade against a roll and the invention of a method of making a composite doctor blade comprising impregnating a composite material comprising unidirectional fibers with a resin. Additionally, the cleaning a circumferential surface/decreasing the roughness of a circumferential surface requires a doctor blade composition very similar to the one

Art Unit: 1744

made by the method of making a composite doctor blade. However, the method of cleaning a circumferential surface/decreasing the roughness of a circumferential surface uses a doctor blade having a beveled edge, and the blade is given a position for cleaning a roll. The method of cleaning a circumferential surface/decreasing the roughness of a circumferential surface of a roll and the method of making a composite doctor blade are unrelated.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
